

Launton C.E. Primary School

There were volcanic eruptions in Oak Class this afternoon as twenty - three scientists, with barely concealed glee, discovered what happens when vinegar and bicarbonate of soda come into contact with one another... The art work in key stage two classes on the theme of volcanoes is quite stunning and you are cordially invited to come and look when the children in all classes host Open Classrooms on the final Wednesday of this half term from 3pm. If parents of children in Chestnut Class and Willow Class are able to reach the hall at 2.55pm, they will just catch those children performing the dance that they have been working on in PE this term. On that day, children will be dismissed from their own classroom.

If you have any old newspapers or cardboard at home that you can spare to send into school to make volcanoes it would be appreciated.

Oxford Brookes University are holding a free Science Bazaar on 24th February; the details are attached.

Over recent weeks we have had a number of visitors in school, all of whom have commented, unprompted, on how engaged the children have been in their learning and how polite and well-behaved they are.

Reminder: if you wish your child to attend Breakfast Club or Afterschool Care, you should book this online through Tucasi twenty -four hours in advance; we cater and staff according to numbers of children booked in. If you have an unforeseen need for a place, please telephone the school office.

Best wishes,

Jane Paterson and the staff team
